

The screenshot shows the PascalABC.NET IDE. The main window displays the following code:

```
1 // пример 1
2
3 uses graphabc;
4 var x,y,r,w,h:integer;
5 begin
6     Line(100,40,200,40);
7     Line(70,70,230,70);
8     Line(30,100,270,100);
9
10 end.
```

At the bottom of the IDE, a status bar indicates "Компиляция прошла успешно (15 строк)". A separate window titled "GraphABC.NET" displays the output of the program, showing three horizontal lines on a white background, corresponding to the lines defined in the code.
